The Rebellion that was born from the defeat of the High-Human Alliance was ultimately defeated by the Sadness, only to be suppressed beneath the terrifying form of "She-Who-Shall-Not-Be-Named." In this desolate world, the "Elden Ring," a symbol of hope in the form of a magical ring that grants the use of divine energy, was brought to the world of fantasy. In this newly-unveiled world of "The Lands Between," a human and an Elden Lord, Rachael and Elian, are brought together by fate and have their adventure begin...?! The Lands Between: The time between the birth and death of the lands. Humanity and the Elden race have lived side by side in this world for hundreds of thousands of years. The time of conflict between the two races came to an end with the defeat of the High-Human Alliance. This war continued for 100 years but at last came to an end. The Elden people returned home and humankind began their normal lives. Together with their allies, the valiant knights, who long protected the weak and protected the Elden race, the humans now begin to live together in peace... At the center of this peaceful land lies the Center of the Worlds. The Elden race has the strongest divine energy in the universe. The humans have humanity, which enables them to understand and learn the strengths and weaknesses of the Elden race. A sacred value is a human that has attained divine energy. The human race and the Elden race have lived in harmony for hundreds of thousands of years. Such a thing has never happened before. What kind of future awaits the two races, which came to this world through a twist of fate? Huge Caves Hundreds of thousands of years ago, the Elden race began living in the Central World, the large cave on the edge of the world. It was like the birth of the Elden race... During the long war against the High-Human Alliance, there were a lot of Elden that were killed. Many Elden found refuge in vast underground caves. The vastness of the caves and vast terrain made the Elden race afraid of their surroundings and caused the Elden race to feel powerless. These caves are filled with huge stalagmites and stalagmites. The Elden race that lived in the Central World were also very powerful. They were so strong

Sauro began development in 2005, after we had developed two games. But we soon decided that it was better not to divide development and tell you too much about our development as time goes on, but we decided to show you a very simple version of what we have been doing. This is why the latest demo is a 20% program of what we are planning. We initially wanted to make a robot simulation game like the Mario games of the Nintendo but since they were for kids in my opinion. Therefore, we decided to make a game where players can control a multitude of robots. We could not figure out what environment they were in, so when this game was released we knew you could be isolated from the most of the surrounding environment and see the performance of the robots. Therefore, we added the tag line not making a puzzle game.

If you want to play the game, as a component, please download the "OIP (Operational Inventory Program) " which is a program you can run on Windows.

Share this post Link to post Share on other sites It sounds good but the price is too high to be affordable for most people. I wanna know if the price is partially the cause of PSN's future, or if it will remain like that? They'd have to raise the price quite a lot to get such a loss. I just remember that back at the beginning of the PS3, they revealed that they weren't making any money. I think they actually said that they were losing at least 10 billion dollars, something like that. That's more than 700 million dollars per year. Now, although I guess a part of the price went to Sony, I would bet the living hell out of the rest of the price went to the game devs. I bet that was the whole point of the PSN, to make it easier for them to make games for the PS3... most of the game dev's I've been to (at the beginning of my game dev career, I've actually been to a lot, because I went to the college that my dad went to), the more consoles the better. 0 Share this post Link to post Share on other sites Thanks for this. I'd like to know how much it's going to cost. Will it be \$39 or \$49? As for the PSN? It's already going to be dead in 6 months. The PSN's gonna fall like that like the Xbox LIVE. GameStop isn't even gonna be open. They're letting the MS stores take over. Think about it. 0 Share this post Link to post Share on other sites I agree with WAAG, its gonna be costly, A game of this caliber will be pricey, But i think the PSN problem is gonna be our best chance for the dying PSN. Hope it won't cost as much as we think, 0 Share this post Link to post Share on other sites I agree with WAAG, its gonna be costly, A game of this caliber will be pricey, But i think the PSN
